

Project Rubrics

Rubrics for Internal Marks- 50 Marks

Parameter	Criteria
Title of the Project (Selection of the topic)	The title of the project indicates clear, concise, and informative parts related to the project defining the subject and scope of the study
	The title of the project is informative and self explanatory and descriptive
	The title of the project does not indicate clear, concise, and informative parts related to the project defining the subject and scope of the study
Literature Review	Good coverage, awareness of relevant prior research, clear structure, stated selection criteria, consistent referencing, clarity of understanding, the literature, informs and adds to the development of the project /case study
	A basic coverage of relevant literature. Inconsistent referencing, The literature offers some additional understanding the problem/ project / development of project /case study
	Inadequate and/or irrelevant evidence, virtually no evidence of appropriate selection, no discussion of selection criteria, unsystematic or omitted referencing
Assessment and Physical Examination	The assessment lists ALL of the pertinent problems for the patient, not just the chief complaint.
	The assessment lists the chief complaint/main problem for the patient but one or more problems is missing.
	The main problem is not listed
Physiotherapy Management	The management section is well-written in a logical, organized manner.
	The paper relays information about management but is slightly disorganized
	The paper does not relay adequate information on the subject, is disorganized and difficult to follow.
Analysis of data	Outstanding analytical techniques and approaches, evidence of creation of new approaches (if appropriate), thorough and rigorous analysis, exceptionally well justified
	Standard approach to collection, limited validity, limited and basic, but acceptable evaluation or technique
	Extremely limited collection of data, poorly identified data, no criteria for evaluation, no analysis
